Customer Success Playbook

Version: 1.0

Confidential – Internal Use Only

1. Purpose

The Customer Success Playbook provides standardized guidelines for Customer Success Managers (CSMs) to improve customer adoption, increase customer satisfaction, reduce churn, and maximize long-term customer value.

The objective is to ensure every customer receives consistent service throughout their lifecycle.

2. Customer Lifecycle

Every customer passes through the following stages:

- 1. Onboarding
- 2. Product Adoption
- 3. Value Realization
- 4. Expansion
- 5. Renewal
- 6. Advocacy

Customer Success Managers are responsible for monitoring customer progress during each stage.

3. Customer Health Score

Customer Health Score is measured on a scale of 0–100.

Health Score	Status	Action
80–100	Healthy	Continue engagement
60–79	Stable	Monitor regularly
40–59	At Risk	Schedule Customer Review
Below 40	Critical	Executive Escalation

Health score is calculated using:

- Product Usage
 - Login Frequency
 - Support Tickets
 - Customer Satisfaction
 - Renewal Readiness
-

4. Early Churn Indicators

The following are considered early warning signs:

- Product usage decreases by more than 30%
- Customer misses Quarterly Business Review
- Multiple unresolved support tickets
- Negative meeting sentiment
- Competitor mentioned during meetings
- Renewal discussions delayed
- Decision maker becomes inactive

Whenever two or more indicators appear together, the account should be classified as High Risk.

5. Quarterly Business Review (QBR)

QBR meetings should be conducted every quarter.

Objectives include:

- Review customer goals
 - Present ROI
 - Discuss challenges
 - Introduce new features
 - Plan future roadmap
-

6. Expansion Opportunities

Expansion opportunities should be explored when:

- Customer Health Score > 80
- Product adoption exceeds 75%
- Customer requests additional users
- Customer requests additional integrations

Possible expansion options:

- Upgrade subscription
 - AI Analytics Module
 - Automation Package
 - Enterprise Security Package
-

7. Customer Communication Best Practices

Customer Success Managers should:

- Respond within one business day
- Maintain professional communication
- Provide proactive updates
- Document every customer interaction
- Follow up after major meetings

Avoid:

- Delayed responses
 - Unclear commitments
 - Untracked action items
-

8. Executive Escalation

Executive escalation is required when:

- Health Score < 40
- Renewal due within 30 days
- Customer expresses intent to leave
- Strategic enterprise customer reports critical issues

Executive participants may include:

- VP Customer Success
 - Director of Customer Success
 - Product Manager
 - Engineering Lead
-

9. Success Metrics

Customer Success Managers are evaluated using:

- Net Revenue Retention (NRR)
- Customer Health Score
- Product Adoption Rate

- Customer Satisfaction (CSAT)
 - Renewal Rate
 - Expansion Revenue
-

10. Summary

Customer Success is focused on long-term customer outcomes rather than short-term support.

Every interaction should improve customer health, strengthen relationships, and increase business value.
